MUSICAL MEDIA FOR EDUCATION

DLP-Video Instructions

What you will need:

- Video Editor: a basic video editor, available in house with most Apple or Windows computers; free, open-source downloads are also available
- DLP Photo File (Photos.Zip download)
- DLP-Audio (MME soundtrack) <mp3>

Steps:

1) Download the DLP-Photo.Zip file. Then import the pictures into the video editor as a new project. The Photo Gallery may also be used to view pictures.

2) Download the DLP-Audio. Then import the audio track as the soundtrack for the new project on the video editor.

3) Listen to the music while looking at the pictures.

4) Decide which photos you would like in the video, and their order first to last. Try to arrange the pictures so they go along well with the soundtrack. Delete photos which you do not want to use in the video. Consider and experiment with the following:

© Musical Media for Education (MME) www.mm-ed.com

- picture order and the length of time each picture is displayed
- cropping and/or cleaning up borders (individual photos)
- adding captions, (subtitles)
- transitions between pictures (different effects)
- camera movement effects
- opening and closing credits
- special effects)

5) Compose, using the video editor

6) Watch. Enjoy. Post to Youtube (as desired)
