

US Presidents

This song contains information about US Presidents. Each century is coded in a different musical key, expressed through the sound of keyboard synthesizers. The names of two-term Presidents have an echo. The political party of each President is marked with a distinctive sound accent (only associations with the Democratic and Republican parties are coded). There are also markers for economic extremes of boom or bust. More musical clues may be added in the DLP version (Digital Learning Project).

Table of US Presidents is on next 2 pages. Due to its length, the table has been split into 2 parts for easy viewing & printing.
